DESCRIPTION

In SAT POS AIO, you will find the **SAT CI140** industrial series or line, which is one of the most comprehensive and robust solutions for implementing POS payment equipment in any type of business or demanding projects such as stores, markets, fashion, warehouses, restaurants, etc. It offers reliable and efficient operation.

The SAT **CI140 Celeron J6412** model integrates a basic and industrial processor, making it ideal for POS systems. It is a robust and high-performance industrial solution with speed. With a wide variety of interface connections compatible with different operational peripherals such as printers, barcode readers, cash drawers, and card readers, this model becomes the ideal high-performance solution for demanding 24/7 work.

SAT industrial equipment offers robust and professional specifications, including a 15" multitouch screen with edge-to-edge glass design, ideal for liquid splash resistance. It also supports modular mounting or installation with dual screens or wall mounting (VESA).

Software Compatibility: The AIO CI150 offers compatibility and excellent performance with programs developed for Windows, Linux, and Ubuntu operating systems.

Heavy-duty performance: An ideal equipment for working in the most challenging conditions, for extended periods of time, 7 days a week, 24 hours a day.

Peripheral connectivity: Versatile peripheral connectivity for seamless integration with a wide range of devices.

Touch operation: The CI140 model integrates multitouch technology that supports up to 5 million touchscreen presses and 5 simultaneous touch points for industrial use.

Wall mounting: The CI140 model offers wall installation or mounting using the VESA 75x75 standard format. It is ideal for modular installations.
