#### DESCRIPTION

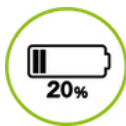

All-in-one Android-based point-of-sale (POS) solutions are becoming increasingly popular in the market. These systems are tailor-made to accommodate a wide range of software developed on Android platforms. They are known for their lightweight, efficient, reliable, and robust design.

The new SAT TB1058 model represents an ideal configuration in terms of performance, quality, and price. It offers users a diverse range of connectivity options, compatible with various peripheral devices such as printers, barcode scanners, and cash drawers, making it a high-performance solution for demanding 24/7 operations. This next-generation Android device features a 10-inch high-resolution touchscreen display, excellent connectivity options, and the added convenience of an integrated thermal POS printer for generating receipts and invoices for end-users.

**Android:** A line of Android-based devices running on version 7.1, offering an efficient, lightweight, and compatible solution for the latest POS software developments.

**Wireless Connectivity:** Provides users with great ease in wireless connectivity with WiFi and Bluetooth.

**Battery:** The new SAT TB1058 unit comes with the integration of an internal backup battery with an 8-hour capacity.

**Compatibility:** A versatile unit with great compatibility with operation peripherals such as readers, printers, scales, among others.

**Integrated Printer:** You'll find the integration of a 58mm thermal POS printer in its structure, ideal for generating receipts or purchase invoices.
