- ✓ Bill counting.
- ✓ Online - Daily deposit report.
- ✓ Counterfeit bill detection function.
- ✓ UV/MG/IR/Length and color sensors.
- ✓ Automatic detection function.
- ✓ Metal structure.

### DESCRIPTION

Our MoneySense 912 cash depository is designed to store more than 1,000 bills in its internal drawer. With USB connectivity, data is transmitted online, allowing you to monitor cash deposits in real time and schedule collection dates and times based on the number of bills inserted or operational requirements. The device features 5 detection sensors (UV/MG/IR/Length/Color) and can be anchored to the floor or furniture.

The web platform is designed to monitor +10 points of sale simultaneously. Through the USB connection, information about each bill is received, enabling the monitor to view the number of bills, the total value stored in the depository, cash withdrawals, and more. The MoneySense 912 provides the security, control, monitoring, and peace of mind that every business manager needs to avoid receiving counterfeit bills.

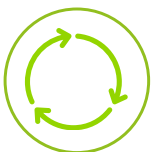

### TARGET MARKETS AND USES

Bill validation that prevents the acceptance of counterfeit bills.

Bill counting and cash stored inside the depository box.

Operation of more than one million opening cycles.

Remote monitoring of the amount of cash stored in each device, +10 devices per user and per branch.

Easy installation and operation; it is recommended that only one person handles the machine keys.
