Description

SAT POS Solutions designed exclusively to meet your needs. Streamline, optimize, and effectively renew your processes, providing the experience your employees need and your customers desire.

We have designed our **22T Printers** to offer the perfect combination of elegance, versatility, and reliability for your company (24/7 operation).

The **22T** series offers automatic calibration function and cutter tool lifespan upgrade to 1.5 million cuts. It is compatible with online firmware updates and supports ESC/POS commands.

Thermal printers are designed to provide an ideal compact experience thanks to their printing speed.

High-quality printing technology for 1D and 2D barcodes.

Thanks to its operation, it allows for dual communication interface (USB-SERIAL), high compatibility with POS systems.

LED paper feed indication technology without neglecting its dual automatic cutter.

Flexibility of installation, with the ease of wall mounting. Ideal for POS billing point of sale solutions.

Multiple connectivity interfaces, including **Bluetooth** system.
