3. Ports

4. Switching on the equipment

After connecting the equipment to the power supply with the adapter in the "DC IN" port, press the start button located in the figure:

5. Internet connection

Connecting to a wired network For wired networks, connect the end of an Ethernet cable (purchased separately) to the Ethernet connector on the SAT AM1835R, then connect the other end to the network router or broadband modem. Consult your Internet service provider for detailed installation instructions.

6. Adjust equipment position

7. Service and support information

The following information describes the technical support available for the product, either during the warranty period or for the life of the product. Refer to the SAT Warranty for a full explanation of the terms of the SAT warranty. Refer to the warranty policies later in this document for details on how to access the full warranty. Refer to the following terms and conditions for detailed information:

Warranty policies.
